

## **TRANSFORMATION MODEL OF 6-MONTH KINESIOLOGICAL TREATMENT OF BOXERS JUNIORS BEGINNERS**

### **Summary**

*On a sample from 15-aged pupils population with anthropological status without pathological aberrations and without boxing experience, it will be applied kinesiological treatment that will last for 6-month. The aim will be maximal possible boxing skill learning. After second and six month of applied treatment it will be established transitive status of testees. Establishing a final status will become when the treatment finishes, and that status will be an indicator of candidates for further training process.*

**Key words:** *transformation model, kinesiological treatment, boxing, juniors*
