

INFLUENCE OF FATIGUE ON ACCURACY KICK IN FOOTBALL IN CONDITIONS OF MAXIMAL KICKING IMPULSE

Summary

In case of kicking the ball by inner side of the foot with better leg in relax state, precision of shooting statistically do not depend of fatigue. Those research confirm hypothesis that kicking ball shooting with maximal intensity and in relax state do not improve precision according to kicking ball with maximal intensity in fatigue state.

Key words: *precision, kicking impulse, intensity, football sport, fatigue*
